I authorize the processing of my data under Legislative Decree 101/2018 and Art. 13 GDPR (EU Regulation 2016/679) for personnel research and selection.

AWARDS AND ACKNOWLEDGEMENTS

SKILLS

I have a strong work ethic and enjoy being on location working on multiple Camera narrative features indie and corporate also TV reality programmes.

Over the years I have invested in my sound kit to be able to record the highest sound with wireless mic and boom microphones. I come with a full sound kit so if we have a budget for one or two boom ops I can run that from my cart or as I've done in the past work out of my bag and do it all myself.

This has given me the ability to work at a fast pace with finding solutions to Lav micing techniques on difficult outfits and adverse weather conditions.

I have worked all over the world on the Race for the Planet documentary for prime where we follow race teams on track days to get the real action of the pits.

In recent years I have been working between motorsport documentaries and narratives such as the brand new episodes of Neighbours and working on dailies for BBC's Phoenix Rise.

Adverts for Trek cereal bars and Adidas And do documentaries or BBC Music and Prada.

I am dyslexic myself and have undiagnosed ADHD which has not stopped me from working as a HOD and working with other people with similar or other disabilities I find that this has helped me understand other people and I have a calm ethic when comes to being a HOD in reflecting what is needed for each situation that develops on set I have also worked on reverberation and reverberation 2 BSL films working alongside divergent people as well as people are deaf.

Other skills

Working in extreme environments deserts the Arctic Circle, boats and ships at sea, mines and queries and also kitchen studios and conferences.

Working around farm animals and farm equipment with heavy applications such as machines diggers and dumpers following PPE regulations.
